Weekly Viz Report #1

Thought this was a very beautiful visualization that demonstrates the population density of Portugal using R, as well as a custom ray shader package that allowed the creator to implement shadows that make the visualization really grab your attention. The graphic designer, Tomas Coroa, used data from Kontur Population (released 2022-06-30).

“R/Dataisbeautiful - Portugal Population Density Map, Done with R Using the Rayshader Package. [OC].” *Reddit*,
